

APRIL 2015
DULLES CORRIDOR ENTERPRISE
REPORT OF THE FINANCIAL ADVISORS

The Airports Authority established the Dulles Corridor Enterprise (DCE) Fund to segregate the financial activity associated with the operation, maintenance and improvement of the Dulles Toll Road (DTR) and construction of the Dulles Corridor Metrorail Project (Rail Project) from the financial operations of the Airports. This report provides an update on the status of capital financing activities and other issues related to the DCE Fund.

Informational Items

- ***Transportation Infrastructure Finance and Innovation Act (TIFIA) Loans.*** The Office of Finance has established a working group to ensure that the numerous notifications and reports required under the TIFIA Loan agreement and related financing documents are submitted in a timely and efficient manner.

Within 90 days of the beginning of each fiscal year, for example, the Airports Authority has to submit an updated financial plan that provides reasonable assurance that there is sufficient funding available to complete the Rail Project. The 2015 Financial Plan Annual Update, that covers the reporting period through December 31, 2014, was submitted on March 25, 2015. The Annual Update summarizes information regarding the progress on the Rail Project that is generally provided to the Airports Authority Board of Directors and the Federal Transit Administration (FTA) on a monthly basis. Over the next few months, the updated financial plan will be reviewed by the TIFIA Joint Program Office, the FTA Regional Office and the Federal Highway Administration's Office of Innovative Program Delivery.

DULLES TOLL ROAD REVENUE BONDS

The total amount of outstanding Dulles Toll Road Revenue Bonds as of April 1, 2015, including accretion, is \$2,081,955,279.³ The tables on the following pages provide detail on each series of bonds.

Refunding Opportunities

The Series 2009A First Senior Current Interest Bonds may be refunded in advance of the 2019 call date. Under current market conditions, a refunding will not generate sufficient debt service savings to pursue a transaction due to the significant negative arbitrage in the required refunding escrow.

³ The amount outstanding includes approximately \$204 million of net accreted value on outstanding capital appreciation bonds, convertible capital appreciation bonds and the TIFIA loan. Interest on those securities is not paid currently. It accretes from the date of issuance and is compounded semi-annually on each April 1 and October 1 until the applicable maturity date, conversion date or payment commencement date, whereupon interest will be payable semi-annually.

⁷ The all-in interest cost for the Series 2009, 2010 and 2014A bond issues is 6.044 percent, 6.154 percent and 4.824 percent, respectively, which results in an overall average cost of capital of 5.843 percent. The potential cost of capital including TIFIA will vary depending on when funds are drawn and the timing of future TIFIA payments and prepayments.

⁸ The Make-Whole Redemption Price is the greater of (i) 100 percent of the principal amount of the Bonds to be redeemed and (ii) the sum of the present value of the remaining scheduled payments of principal and interest to the maturity date of the Bonds to be redeemed discounted to the date on which the Bonds are to be redeemed on a semi-annual basis, assuming a 360-day year consisting of twelve 30-day months, at the adjusted Treasury Rate plus 50 basis points, plus accrued and unpaid interest on the Bonds to be redeemed on the redemption date.
