

DECEMBER 2012 FINANCIAL ADVISOR REPORT – THE AVIATION ENTERPRISE

INTRODUCTION

The Finance Committee has requested that the Aviation Enterprise Financial Advisor provide a monthly report on the status of the financing of the Capital Construction Program (CCP) and any related issues concerning the Airports Authority's Aviation Enterprise capital financing activities. The Financial Advisor presents this Monthly Report, focusing on the specific debt management projects underway, the debt policy framework guiding these projects and the financing of the CCP in general.

DISCUSSION SUMMARY

This paper is organized as follows:

- I. Executive Summary
- II. Action Items
 - A. No items to report
- III. Informational Items
 - A. Review of 2012 Plan of Finance
 - B. 2013 Plan of Finance
- IV. Monthly Updates
 - A. CCP: Actuals vs. Projections
 - B. Short-term Liquidity Forecast
 - C. Variable Rate Programs
 - D. Swaps –Swap Performance

Exhibits

- A. Airports Authority's Capital Construction Program
- B. Airport System Revenue Bonds
 - Summary of Bonds Outstanding
 - Refunding Monitor
- C. Variable Rate Programs
 - Overview
 - Historical performance
- D. Swap Program
 - Airports Authority Swap Profile
 - Historic Performance of 2009 Swaps

I. EXECUTIVE SUMMARY

Action Items

- *No Action Items to report this month*

Informational Items

- *Review of 2012 Plan of Finance.* Over the course of the year, the Airports Authority has pursued various financings consistent with the 2012 Plan of Finance outlined in January, chief among these have been: renewal of the Aviation Enterprise underwriting syndicate; current and advance refunding opportunities; Rating Agency strategy; and variable rate bonds and expiring bank facilities.
- *2013 Plan of Finance.* Finance Staff and the Financial Advisor will meet on December 11 to develop the outlines of the 2013 Plan of Finance. Topics to be discussed include: current and advance refunding opportunities, timing, size and form of planned new money to be issued in 2013; ongoing monitoring of variable rate portfolio; ongoing monitoring of swap portfolio; and annual rating agency strategy. The Financial Advisor will report in more detail in January 2013.
- *Capital Construction Program (CCP).* CCP expenditures in 2012 are budgeted at \$274.6 million, including construction and capitalized interest costs. CCP expenditures for November were not available at the time this paper was finalized. Through October 2012 expenditures totaled \$93.7 million.

II. ACTION ITEMS

No Action Items to report this month.

III. INFORMATIONAL ITEMS

(III.A) Review of 2012 Plan of Finance

On January 18, 2012, we reported to the Finance Committee on the various components of the expected 2012 Plan of Finance. Chief among these items that have been addressed over the course of this year:

- Renewal of the Aviation Enterprise underwriting syndicate
- Current and advance refunding opportunities
- Rating Agency strategy
- Variable rate bonds and expiring bank facilities

Renewal of Aviation Enterprise underwriting syndicate. The prior Aviation Enterprise underwriting team was scheduled to expire in June 2012. The Aviation Enterprise Financial Advisor, the Dulles Corridor Enterprise Financial Advisors and Finance Staff developed a coordinated approach to re-evaluating the underwriting teams and, at the direction of the Board, initiated the Underwriting RFP process in the Spring. In March and April, the Finance Committee and Board selected the underwriting teams for the Aviation Enterprise and Dulles Corridor Enterprise and selected the co-senior managers for the Aviation Enterprise's sale of refunding bonds.

Current and advance refunding opportunities. On June 5, the Airports Authority sold \$291.035 million of Series 2012A (AMT) Bonds and \$20.790 million Series 2012B (non-AMT) Bonds to:

- Current refund \$336.32 million Series 2001A, Series 2002A and Series 2002D (AMT) Bonds; and
- Advance refund \$20.65 million Series 2003A (non-AMT) Bonds.

The combined refunding generated \$40.6 million of net present value savings (over 11.1% of the refunded par amount). Total debt service savings through 2032 (the term of the Bonds) totals over \$77.0 million. Debt service savings in years 2013-2015 are \$11 million annually and \$8 million in 2016, materially benefitting the Airports Authority's airline rate base at Dulles International Airport over the near term.

Rating Agency strategy. As part of the issuance of Series 2012A-B Refunding Bonds, the rating agencies affirmed the Airports Authority's prior ratings:

- Moody's: Aa3, negative outlook
- S&P: AA-, stable outlook
- Fitch: AA-, stable outlook

The financing team and Airports Authority Staff prepared presentations for each of the rating agencies highlighting the Airports Authority's unique credit strengths. The two main areas of concern cited by the rating agencies were the reduced coverage levels and high cost per enplanement levels. Despite these concerns, Fitch and S&P have maintained their stable outlooks and only Moody's continues to assign a negative outlook

to the Airports Authority. This negative outlook was originally assigned to the Airports Authority in June 2010. Another specific concern cited by Moody's was that reduced Federal spending patterns may reduce local demand for air travel.

Variable rate bonds and expiring bank facilities. In January, Finance Staff and the Financial Advisor discussed the potential of replacing all or some portion of the \$530 million of scheduled facility expirations in 2013 in advance of the termination dates. At the direction of the Finance Committee, Finance Staff and the Financial Advisor ran a bank solicitation process that included over 40 banks. In August, the Airports Authority received nine proposals offering nearly \$2 billion of bank facilities at attractive pricing. At its November meeting the Finance Committee approved and at its December meeting the Board will approve:

- 1) direct purchase of Airport System Revenue Variable Rate Bonds, Series 2003D and to terminate the prior Syncora¹ Bond Insurance Policy (term through December 2016);
- 2) substitution of Letter of Credit (LOC) for Airport System Revenue Variable Rate Bonds, Series 2009D (term through December 2017);
- 3) extension of LOC for Airport System Revenue Variable Rate Bonds, Series 2010C (term through December 2015); and
- 4) extension of the Index Rate Period for Airport System Revenue Variable Rate Bonds, Series 2010D (term through December 2015).

Series	Amount (\$ millions)	Hedged?	Current Facilities			New Facilities		
			Bank/Product	Costs (bps)	Expiration	Bank/Product	Costs (bps)	Expiration ²
2003D1	\$63.2	No	Wells LoC	27	Mar 2013	New BofA DF	+65 ³	Dec 2016
2009D	\$130.2	Yes	BofA LoC	55	Jul 2013	New TD LoC	56	Dec 2017
2010C	\$162.7	Partial	Barclays LoC	55	Sept 2013	Extend LOC	55/50 ⁴	Dec 2015
2010D	\$164.7	Yes	Wells DF	+75 ⁵	Sept 2013	Extend DF	+65 ⁶	Dec 2015

Following the completion of these bank refinancings, planned to occur on or before December 20, the Airports Authority will have (i) no bank facility expirations until 2014, (ii) maintained the diversity of its bank group and (iii) diversified its renewal risk. Prior to the execution of this bank plan, the weighted average cost of the bank facilities (excluding commercial paper) is 63.1 basis points and the weighted average expiration

¹ Syncora is currently rated "Ca" by Moody's (four notches below "Baa3" investment grade) and is unrated by S&P and Fitch.

² Assuming a closing in December 2012.

³ The fee for the proposed BofA Direct Funded Indexed Floater is 72% of one month LIBOR plus 65 bps.

⁴ Barclays proposes to keep the existing LoC cost at 55 bps through the existing term through September 2013 and then lower the fee to 50 bps for two years after.

⁵ The fee for the current Wells Direct Funded Indexed Floater is 72% of one month LIBOR plus 75 bps.

⁶ The proposed fee for the Direct Funded Indexed Floater is the spread over 72% of one-month LIBOR.

occurs in 2.0 years. Upon execution, the weighted average cost of the bank facilities will be 62.9 basis points and the weighted average expiration date is 3.6 years.⁷

(III.B) 2013 Plan of Finance

Finance Staff and the Financial Advisor will meet on December 11 to develop the outlines of the 2013 Plan of Finance. Topics to be discussed include: current and advance refunding opportunities, timing, size and form of new money to be issued in 2013; ongoing monitoring of variable rate portfolio; ongoing monitoring of swap portfolio; and annual rating agency strategy. While the Financial Advisor will report to the Finance Committee in more detail in January 2013, we would note that we continue to monitor the refunding opportunity below.

Refunding Update. The Financial Advisor and Finance Staff continue to monitor the economics of certain refunding opportunities the Airports Authority could consider pursuing, including a taxable advance or forward AMT refunding of outstanding 2003A (AMT) and a taxable advance refunding of 2003C (Taxable) Bonds. Board approval would be required to proceed with these refundings. It should be noted that recently the taxable market (both absolute rate levels and credit spreads) has been significantly more volatile than the tax-exempt market. Therefore, the results summarized below could vary significantly from day-to-day.

Refunding Savings at Current Rates Assuming January 1, 2013 Delivery Date							
Refunded Series	Refunding Series	Callable Par (\$ millions)	Call Date/ Call Premium	Par that Meet Min. Thresholds (\$ millions)*	NPV Savings \$/ %	Negative Arbitrage	Breakeven**
2003A (AMT)	Taxable Advance	\$149.030	10/1/13 @ 100%	\$149.030	\$12.2 mm / 7.9%	\$4.1 mm	95
2003A (AMT)	AMT Forward	\$149.030	10/1/13 @ 100%	\$149.030	\$18.0 mm / 11.7%	\$1.1 mm	45
2003C (Taxable)	Taxable Advance	\$31.305	10/1/13 @ 100%	\$31.305	\$4.8 mm / 14.1%	\$0.5 mm	40
Total		\$180.340		\$180.340	\$14.8 mm / 7.9%	\$5.3 mm	

* Assumes that the 2013 maturity would also be refunded in order to allow for the release of the reserve funds.

**Rates could rise this much by July 3, 2012 and the Airports Authority would be able to achieve the same net present value savings by executing a current AMT or taxable refunding.

In today's market, a forward delivery AMT refunding of all outstanding Series 2003A Bonds is more cost effective than a taxable advance refunding. We estimate that forward delivery AMT refunding bonds would carry a monthly premium of 6-7 basis points per month, allowing the Airports Authority to lock in rates for refunding bonds to be delivered on or around July 3, 2013. As currently structured, a forward refunding would incur a total premium of 36-42 basis points.

⁷ To determine the weighted average costs, the cost for indexed floaters is assumed at just the spread and does not take into account the type of index.

Rather than an advance refunding, a June 2013 bond sale and July 2013 closing would be a *current* refunding: the current refunding of the Series 2003A could be done on a tax-exempt AMT basis; the current refunding of the Series 2003C would still need to be done on a taxable basis. In addition, in each case the escrow would be limited to 90 days, thus reducing the previously cited negative arbitrage by approximately half and increasing the savings by a like amount, all else being equal.

IV. MONTHLY UPDATES

(IV.A) CCP: Actuals vs. Projections

Exhibit A sets forth the major 2001-2016 Capital Construction Program (“CCP”) projects underway at the Airports Authority, as well as historical CCP actual versus projected expenditures. For 2012, CCP expenditures including construction and capitalized interest costs were budgeted at \$274.6 million. CCP expenditures for November were not available at the time this paper was finalized. Through October 2012 expenditures totaled \$93.7 million.

CCP Projections vs. Actuals (\$ millions)

	<i>General Ledger Actual</i>	<i>Original Projection</i>	<i>Variance</i>	<i>Variance (%)</i>
12-Jan	\$4.51	\$14.20	(\$9.69)	-68.24%
12-Feb	\$13.21	\$22.30	(\$9.09)	-40.76%
12-Mar	\$12.55	\$13.10	(\$0.55)	-4.20%
12-Apr	\$12.00	\$31.90	(\$19.90)	-62.38%
12-May	\$7.08	\$24.20	(\$17.12)	-70.74%
12-Jun	\$7.01	\$20.40	(\$13.39)	-65.64%
12-Jul	\$7.38	\$27.20	(\$19.82)	-72.87%
12-Aug	\$10.06	\$32.90	(\$22.84)	-69.42%
12-Sep	\$14.77	\$16.80	(\$2.03)	-12.08%
12-Oct	\$5.13	\$18.70	(\$13.57)	-72.57%
2012 Totals	\$93.70	\$221.70	(\$128.00)	-57.74%

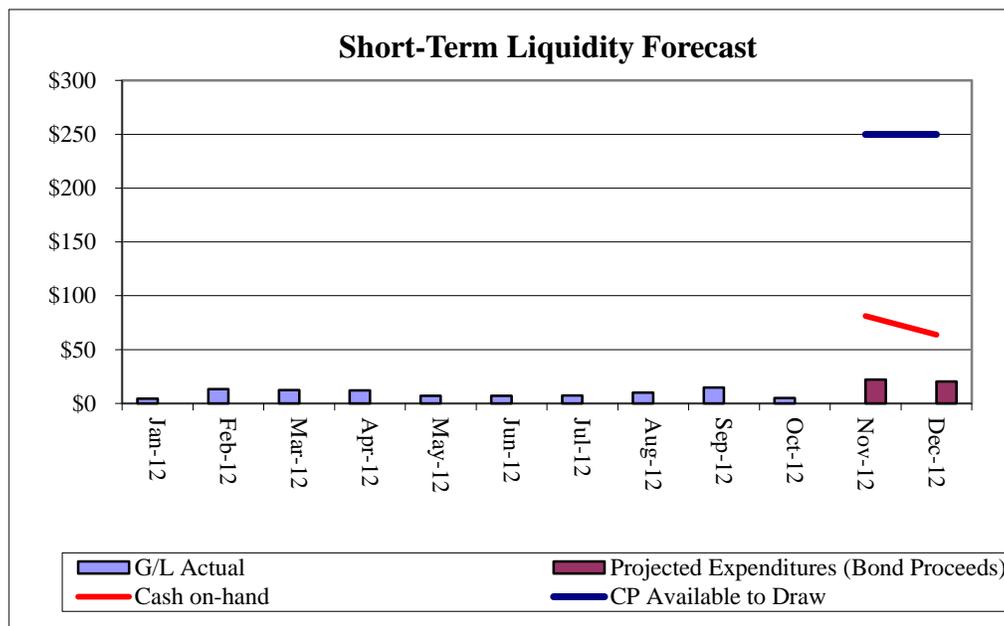

(IV.B) Short-term Liquidity Forecast

The following (including the table and chart) is based on information provided to the Financial Advisor by Finance Staff.

As of November 1, 2012 (data as of December 1 was not available when this paper was finalized), the Airports Authority had \$81.3 million of cash-on-hand and \$250.0 million of additional available liquidity in the form of undrawn CP One capacity.

Short-term Liquidity Forecast (\$ millions)

Beginning of Month	Cash Available	CP Available to Draw	PFCs	Grants	Projected Expenditures
12-Nov	81.3	250.0	0.4	4.2	-22.2
12-Dec	64.7	250.0	0.4	4.2	-20.4

(IV.C) Variable Rate Programs

In addition to the approximately \$966.6 million of variable rate debt that the Airports Authority has currently outstanding, the Airports Authority can issue up to \$250.0 million of CP One Notes which are currently “on-the-shelf.”

The approximately \$343.9 million in unhedged variable rate debt outstanding represents approximately 6.8 percent of the outstanding \$5.1 billion indebtedness.

Gross Variable Rate Exposure

Fixed Rate Debt Percentage:			
Fixed Rate Debt	\$4,090,855,000		
2009D VRDOs (Hedged)	130,185,000		
2010C2 VRDOs (Hedged)	99,660,000		
2010D VRDOs (Hedged)	164,655,000		
2011A VRDOs (Hedged)	228,165,000		
Fixed Rate	\$4,713,520,000	93.20%	
Variable Rate Debt Percentage:			
2003D VRDOs	63,225,000		
2010C1 VRDOs	63,050,000		
2011B VRDOs	196,675,000		
CP Notes	21,000,000		
Variable Rate	\$343,950,000	6.80%	
Combined Total	\$5,057,470,000	100.00%	

The Airports Authority’s current \$402.5 million unrestricted cash balances in short-term investments can be netted against variable rate debt exposure to produce a “net variable rate exposure”. Currently, the unrestricted cash balances exceed the amount of short-term investments.

Exhibit C-2 illustrates for the current year the rolling three-month average spreads to the SIFMA of the Airports Authority's variable rate programs, as well as, historic spreads to SIFMA by quarter.

(IV.D) Swaps – Monthly Swap Performance

2002 Swap: Under the terms of the swap agreement, the Airports Authority pays to the counterparty a fixed rate of 4.45 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparty 72 percent of one-month LIBOR based upon the outstanding notional amount of the swap. The 2002 Swap originally hedged the Series 2002C Bonds and now hedges the 2011A-2 Indexed Floaters which refunded the Series 2002C Bonds in full. The Airports Authority pays 72 percent of LIBOR plus 77 basis points on the Indexed Floaters. The All-In Effective Rate of the swap is therefore equal to the fixed swap rate of 4.45 percent plus the spread of 77 basis points: 5.22 percent. This All-In Effective Rate remains fixed and monthly cash flow history on this swap is no longer included in Exhibit D.

2009 Swaps: Under the terms of the swap agreements, the Airports Authority pays to the counterparties an average fixed rate of 4.10 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparties 72 percent of one-month LIBOR based upon the outstanding notional amount of their respective swaps. The 2009 Swap originally hedged the Series 2009A and 2009D Bonds. The Series 2009A were partially refunded by the Series 2010C2 Bonds and the remaining portion was fully refunded by the Series 2011A-3 Bonds. The 2009 swaps now hedge the 2011A-3 Indexed Floaters and the 2009D and 2010C2 VRDOs. On the Indexed Floaters, the Airports Authority pays 72 percent of LIBOR plus 77 basis points. The All-In Effective Rate of the swap related to these Bonds is therefore equal to the fixed swap rate of 4.10 percent plus the spread of 77 basis points: 4.87 percent. This All-In Effective Rate remains fixed and monthly cash flow history on this swap associated with the Indexed Floaters is no longer included in Exhibit D. **Exhibit D-3** provides the historical monthly cash flow history of the 2009 swaps associated with the hedged VRDOs (currently the 2009D and 2010C2).

2010 Swap: Under the terms of the swap agreement, the Airports Authority pays to the counterparty a fixed rate of 4.11 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparty 72 percent of one-month LIBOR based upon the outstanding notional amount of the swap. The 2010 Swap hedges the Series 2010D Indexed Floaters. The Airports Authority pays 72 percent of LIBOR plus 75 basis points on the Indexed Floaters. The All-In Effective Rate of the swap is therefore equal to the fixed swap rate of 4.11 percent plus the spread of 75 basis points: 4.86 percent. This All-In Effective Rate remains fixed and monthly cash flow history on this swap is not included in Exhibit D.

2011 Swap: Under the terms of the swap agreement, the Airports Authority pays to the counterparty a fixed rate of 3.86 percent on the outstanding notional amount of the swap.

In return, the Airports Authority receives from the counterparty 72 percent of one-month LIBOR based upon the outstanding notional amount of the swap. The 2011 Swap hedges the Series 2011A-1 Indexed Floaters. The Airports Authority pays 72 percent of LIBOR plus 77 basis points on the Indexed Floaters. The All-In Effective Rate of the swap is therefore equal to the fixed swap rate of 3.86 percent plus the spread of 77 basis points: 4.63 percent. This All-In Effective Rate remains fixed and monthly cash flow history on this swap is not included in Exhibit D.

Exhibit A Airports Authority's CCP

Major projects under construction at Reagan National include:

- Runway 1-19 Runway Safety Area – General Construction Package;
- NAVAIDS – ALSF 2;
- River Rescue Facility;
- Terminal A Building Rehabilitation, Lobby Improvements;
- Terminal A Outbound Baggage Makeup Facility; and
- North Substation Gear Replacement

Major projects under construction at Dulles International include:

- South Baggage Basement In Line High Volume Baggage Screening;
- East and West Baggage Basement EDS In Line High Volume Baggage Screening;
- Concourse C/D Rehabilitation;
- Main Terminal Commissioning Phase 1;
- Fire Station Alerting Systems for Station 302 and 303;
- North – South Domestic Water Connection Improvements;
- Jet Fuel Pipeline – Fuel Inbound Particle Separators;
- High Temperature Hot Water Generator Procurement; and
- Taxiway Z1 Widening and UAL Hangar Facility Enabling Projects

Historical CCP Projections vs. Actuals (2001-2011) (\$ millions)

	<i>General Ledger</i>	<i>Projection*</i>	<i>Variance</i>	<i>Variance (%)</i>
	<i>Actual</i>			
2001 Totals	\$370.8	\$429.8	(\$58.9)	(13.7%)
2002 Totals	\$295.6	\$346.5	(\$50.9)	(18.4%)
2003 Totals	\$282.7	\$321.9	(\$39.2)	(12.2%)
2004 Totals	\$349.3	\$349.9	(\$0.6)	(0.0%)
2005 Totals**	\$555.8	\$574.4	(\$18.6)	(3.2%)
2006 Totals	\$672.2	\$713.2	(\$41.0)	(5.7%)
2007 Totals	\$719.4	\$689.7	\$29.7	4.3%
2008 Totals	\$537.7	\$672.8	(\$135.1)	(20.1%)
2009 Totals	\$349.8	\$474.2	(\$124.3)	(26.2%)
2010 Totals	\$220.2	\$327.3	(\$107.1)	(32.7%)
2011 Totals	\$167.4	\$299.4	(\$131.9)	(44.1%)

*Historical projections for 2001-2003 do not reflect periodic revisions. 2002: the last revision for 2002 projected \$271 million of capital spending for the year. 2003: the last revision for 2003 projected a total of \$287.5 million.

** Projection reflects December 2005 budget amendment.

Exhibit B-2 Airport System Revenue Bonds Refunding Monitor

Current Refunding Opportunities

The Airports Authority does not have any currently callable bonds outstanding.

Advance Refunding Candidates – Non-AMT

The 2004A Non-AMT Bonds may be advance refunded⁸.

<i>Series</i>	<i>Callable Par/ Maturities</i>	<i>Range of Interest Rates</i>	<i>Call Date</i>	<i>Call Premium</i>	<i>Savings Required</i>	<i>Net PV Savings</i>	<i>Negative Arbitrage</i>	<i>Breakeven</i>
2004A	\$13,510,000 (2015-2022)	4.50% - 5.00%	10/1/2014	100%	2%	\$2.1 mm; 15.6% \$13.5 mm refunded	\$402,000	60 bps

Refunding Candidates – AMT

The Series 2003A may NOT be advance refunded with the proceeds of tax-exempt bonds. However, it is illustrative to consider hypothetical advance refunding results to use as a benchmark in evaluating the efficiency of other refunding strategies. While we present in Section III of this paper a potential taxable advance and AMT forward refunding of certain outstanding Series 2003A Bonds, the table below illustrates results of a hypothetical AMT advance refunding.

<i>Series</i>	<i>Callable Par/ Maturities</i>	<i>Range of Interest Rates</i>	<i>Call Date</i>	<i>Call Premium</i>	<i>Savings Required</i>	<i>Net PV Savings</i>	<i>Negative Arbitrage</i>	<i>Breakeven</i>
2003A	\$149,030,000 (2014-2033)	4.25% - 5.50%	10/1/2013	100%	2-3%	\$19.4 mm; 13.4% \$144 mm refunded*	\$2.8 mm	35-40 bps

*Note that not all of the Series 2003A Bonds meet the refunding criteria. Due to the maximum annual debt service requirement for the 2003A DSRF Requirement, cashflow savings would be affected by a partial refunding.

Refunding Candidates – Taxable

The Series 2003C and 2005C Bonds may be advance refunded with the proceeds of taxable bonds. Under current market conditions, the 2005C Bonds do not meet the savings requirement.

<i>Series</i>	<i>Callable Par/ Maturities</i>	<i>Range of Interest Rates</i>	<i>Call Date</i>	<i>Call Premium</i>	<i>Savings Required</i>	<i>Net PV Savings</i>	<i>Negative Arbitrage</i>	<i>Breakeven</i>
2003C	\$31,305,000 (2014-2023)	5.29% - 6.00%	10/1/2013	100%	1%	\$4.8 mm; 15.2% \$31.3 mm refunded*	\$511,000	40-45 bps

*These results reflect the savings associated with the callable bonds (the non-callable 2013 maturity does not produce required savings). All of the Series 2003C Bonds would need to be refunded (even those below the required savings threshold, if any) so that the reserve fund could be released. Otherwise, cashflow savings are negatively affected.

⁸ The Series 2005B, Series 2005D, Series 2006C and Series 2012B Bonds are non-AMT. However, they may not be advance refunded since the proceeds were used to advance refund other Airports Authority Bonds. The Non-AMT Bonds (2009B, 2009C, 2010A, 2010F1) were issued as private activity Non-AMT Bonds and cannot be advance refunded. The 2011D Bonds were issued as a current refunding but given the length of time to the call date is not a viable refunding candidate.

Below are the refunding guidelines previously adopted by the Board:

Time Between Call Date and Issuance of Refunding Bonds	Traditional Financing Products Minimum PV % Savings	Non-Traditional Financing Products Minimum PV % Savings
0 to 90-days (Current)	Greater of Call Premium or 1%	Call Premium + 1% - 2%
90-days to 1-year	Call Premium + 1%	Call Premium + 2% - 3%
1-year to 2-years	Call Premium + 2%	Call Premium + 3% - 4%
> 2-years	Call Premium + 3%	Call Premium + 4% - 5%

Exhibit C-1 Variable Rate Programs - Overview

Summary of Dealers, Credit Enhancement and Bank Facilities.

Details of Dealers.

<i>Dealer</i>	<i>Program/ Series</i>	<i>Amount (\$MM)</i>	<i>Remarketing Fees</i>

¹² On April 16, 2009, Wells Fargo took over the remarketing of the 2003D-1 Bonds from Goldman Sachs.

¹³ On April 23, 2009, Morgan Keegan took over the remarketing of the 2003D-2 Bonds from Morgan Stanley; on July 30, 2009, Wachovia took over the remarketing from Morgan Keegan and became the LoC Provider replacing Regions Bank. As of October 1, 2010, the 2003D-2 Bonds were no longer outstanding.

¹⁴ Bank of America replaced UBS as Remarketing Agent in April 2008.

Note: 2011B is a fixed spread to SIFMA and will not be tracked here.

Exhibit D-1 Swap Profile

The table below summarizes the Airports Authority's current swap profile. All of the Airports Authority's swaps call for a fixed rate to be paid by the Airports Authority to the counterparty and a variable rate to be received by the Airports Authority based upon 72 percent of LIBOR.

Trade Date	Effective Date	Termination Date ("final maturity")	Swap Providers	Ratings Moody's/S&P/ Fitch	Outstanding Notional Amount (\$millions) ⁸	Hedged Series	Current Termination Value ¹⁵	Fixed Rate
7/31/01	8/29/02	10/1/21	Bank of America	A3/A/A	\$47.6	2011A-2	(\$8,972,000)	4.445%
6/15/06	10/1/09	10/1/39	JPMorgan Chase Bank of America	Aa3/A+/A+ A3/A/A	\$180.8 <u>\$104.7</u> \$285.5	2011A-3 2009D 2010C2	(\$63,511,000) <u>(\$36,694,000)</u> (\$100,205,000)	4.099%
6/15/06	10/1/10	10/1/40	Wells Fargo	Aa3/AA-/AA-	\$164.7	2010D	(\$60,556,000)	4.112%
5/13/05	10/1/11	10/1/39	Wells Fargo	Aa3/AA-/AA-	\$125.0	2011A-1	(\$37,978,000)	3.862%
Aggregate Swaps					\$622.8		(\$207,711,000)	

The table below presents the all-in effective rate of the swaps. The 2002, 2010 and 2011 swaps hedge only indexed floaters. The 2009 swaps hedge both indexed floaters and VRDOs (separate all-in effective rates are presented for each). The interest rate paid on each of the indexed floaters is equal to 72 percent of LIBOR plus an agreed upon spread. The all-in effective rate is therefore equal to the fixed swap rate plus the agreed upon spread (77 basis points on the 2011A Bonds and 75 basis points on the 2010D Bonds). In Exhibit D-2, we track the monthly performance and all-in effective rate of the 2009 swap in relation to the hedged VRDOs.

Effective Date	Notional Amount (\$millions)	Hedged Series	Fixed Rate	All-In Effective Rate*
8/29/02	\$51.7	2011A-2 (Indexed Floaters)	4.445%	5.215%**
10/1/09	\$57.0	2011A-3 (Indexed Floaters)	4.099%	4.869%**
10/1/09	\$233.5	2009D&2010C2 (VRDOs)	4.099%	5.028%
10/1/10	\$167.4	2010D (Indexed Floaters)	4.112%	4.862%
10/1/11	\$125.0	2011A-1 (Indexed Floaters)	3.862%	4.632%

*The All-In Effective Rate takes into account the agreed upon spread on indexed floaters and remarketing and bank facility costs on the VRDOs.

**Note that the all-in effective rate is effective as of October 1, 2011 and does not take into account performance prior to that date when the swaps hedged the Series 2002C and 2009A Bonds (VRDOs) The Series 2002C and 2009A Bonds are no longer outstanding.

¹⁵ Amounts as of November 30, 2012; A negative value represents a payment by the Airports Authority to the counterparty if the swap is terminated in the current market; a positive value represents a receipt by the Airports Authority if the swap is unwound in the current market.

Exhibit D-2

2009 Swap Effective Interest Rate to-date and Monthly Performance

The Airports Authority's 2009 Swap is a fixed-payor interest rate swap. Under the 2009 Swap, (a) the Airports Authority pays a fixed rate, 4.099 percent, to the swap counterparty; (b) in return, the swap counterparty pays the Airports Authority a variable rate of interest equal to 72 percent of one-month LIBOR. This variable rate received from the counterparty was designed to closely correlate the interest rate the Airports Authority pays on the underlying variable rate bonds, thereby creating essentially fixed rate debt (synthetic fixed rate debt). The Swap Agreement was dated June 15, 2006, and effective October 1, 2009. The 2009 Swap counterparties were Bear Stearns and Bank of America. However, Bear Stearns was bought by JP Morgan in March 2008. The table below presents the 72 percent of one-month LIBOR rate received from the counterparties, the average monthly interest rate on the hedged variable rate bonds paid by the Airports Authority (excludes hedged indexed floaters), and the resulting effective all-in interest rate on the swap. The 2009 swap hedges the Series 2009D Bonds and the Series 2010C2 Bonds. The swap previously hedged the Series 2009A Bonds until these bonds were refunded by the 2011A-3 Indexed Floaters (the calculated effective rate does take into account the 2009A Bonds prior to being refinanced).

Hedged VRDOs and Swaps

Period	1-month LIBOR ¹⁶	72% 1-month LIBOR	Average All-In Aggregate Interest Rate ¹⁷	Average Fixed Swap Rate	Effective Interest Rate ¹⁸	All-In Effective Rate to Date

¹⁶ One-month LIBOR is weighted average of weekly one-month LIBOR as reset each Tuesday for a Thursday effective date except for the Bank of America swap where the two London Banking Days are replaced by one London Banking Day.

¹⁷ The 2009D1 and 2010C2 variable rate bonds are currently in a weekly mode, with interest rate resets each Wednesday for a Thursday effective date. The 2009D2 variable rate bonds are currently in a daily mode. The 2009A variable rate bonds were in a weekly mode, with interest rate resets each Tuesday for a Wednesday effective date. The interest rate is the all-in interest rate including bank facility costs.

¹⁸ Totals will not add due to the day count difference of 30/360-day basis for the fixed swap rate and actual/actual day basis for the floating swap rate.
