I. EXECUTIVE SUMMARY

Action Items

→ **2019 Underwriter Syndicate Selection.** At the January 2019 meeting, the Board adopted a resolution to select 15 investment banking firms to the underwriter pool. To select the underwriting syndicates for the 2019 bond transactions, interviews were conducted on January 30 and 31 by the Technical Evaluation Committee (TEC) for the firms in the underwriter pool. A recommendation on the 2019 underwriting syndicates will be provided under a separate agenda item.

Informational Items

→ **Series 2015D Defeasance.** On January 29, 2019, proceeds of the sale of the Western Lands at Dulles International along with other available funds were used to defease \$30.5 million of Series 2015D Bonds. The Series 2015D Bonds refunded the Series 2005C Bonds that were used to fund the original purchase of the Western Lands.

→ **Airport Economics.** For the Committee's information only, separate slides are provided on the airport economic model at the Airports Authority.

II. ACTION ITEMS

(II.A) 2019 Underwriter Syndicate Selection

At the January 2019 meeting, the Board adopted a resolution to select 15 investment banking firms to the underwriter pool. To select the underwriting syndicates for the 2019 bond transactions, interviews were conducted on January 30 and 31 by the Technical Evaluation Committee (TEC) for the firms in the underwriter pool. A recommendation on the 2019 underwriting syndicates will be provided under a separate agenda item.

III. INFORMATIONAL ITEMS

(III.A) Series 2015D Defeasance

The proceeds of the Series 2005C Bonds were used to fund the purchase of the Western Lands. In 2015, the Series 2005C Bonds were refunded in their entirety by the Series 2015D Bonds. After the sale of the Western Lands, the Airports Authority defeased all of the outstanding Series 2015D Bonds in the amount of \$30.5 million which reduced annual debt service costs by approximately \$2.7 million through 2035.

The cost to defease the Series 2015D Bonds was \$34.0 million and was funded by the release of the Series 2015D Bonds debt service funds and debt service reserve fund in the amount of \$3.4 million, as well as \$30.6 million from the proceeds of the sale of the Western Lands. The defeasance transaction was successfully closed on January 29.

(III.B) Airport Economics

For the Committee's information only, separate slides are provided on the airport economic model at the Airports Authority.

IV. MONTHLY UPDATES

(IV.A) CCP: Actuals vs. Projections

Exhibit A sets forth the major CCP projects underway at the Airports Authority, as well as historical CCP actual versus projected expenditures. The CCP expenditures for 2018 are budgeted at \$342.7 million including construction and capitalized interest costs. Expenditures in December 2018 totaled \$14.8 million. At the time of the writing of this report, expenditures for January 2019 were not available.

2018 Totals (Thru December)	\$157.80	\$342.66	(\$184.86)	(53.9%)

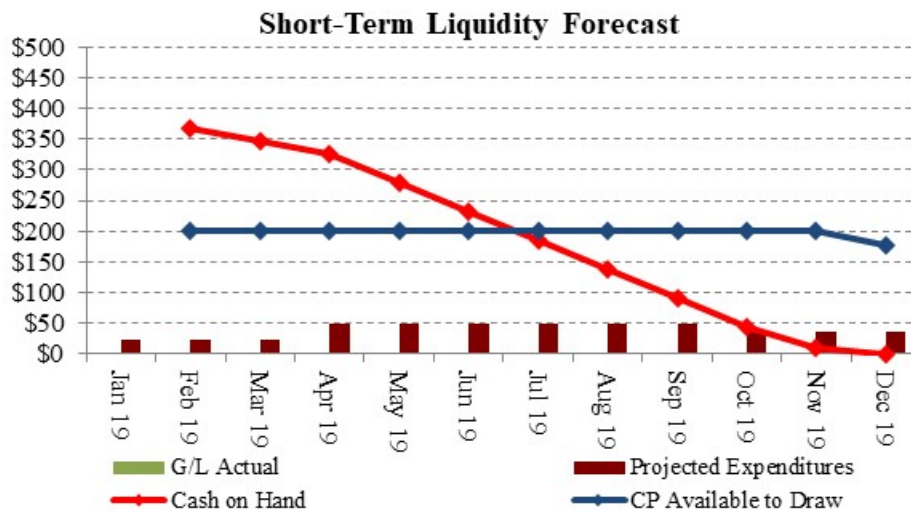

(IV.B) Short-Term Liquidity Forecast

The following (including the table and chart) is based on information provided to the Financial Advisor by Finance Staff.

At the beginning of February 2019, the Airports Authority had \$367.5 million of cash-on-hand¹ and \$200 million of additional available liquidity in the form of undrawn CP Series Two capacity.

Short-term Liquidity Forecast (\$ millions)					
Beginning of Month	Cash Available	CP Available to Draw (End Bal)	PFCs	Grants	Projected Expenditures

Dec-19	0.00	176.31	0.00	1.73	35.35

The liquidity forecast does not include the proceeds of the planned 2019 new money bond transaction.

¹ Cash-on-hand includes proceeds of the Series 2018A Bonds and Funds 63 and 64.

(IV.C) Variable Rate Programs

In addition to approximately \$740.4 million of outstanding variable rate debt, the Airports Authority can issue up to \$200 million of CP Two Notes which are currently “on-the-shelf.”

Outstanding unhedged variable rate debt of \$222.6 million represents approximately 5.1 percent of the Airports Authority’s \$4.4 billion of outstanding indebtedness.

Gross Variable Rate Exposure

Fixed Rate Debt Percentage:			
Fixed Rate Debt		\$3,653,630,000	
2009D VRDOs (Hedged)		113,700,000	
2010C2 VRDOs (Hedged)		89,830,000	
2010D Index Floater (Hedged)		145,200,000	
2011A VRDOs (Hedged)		169,065,000	
	Fixed Rate	\$4,171,425,000	94.9%
Variable Rate Debt Percentage:			
2003D VRDOs		51,625,000	
2010C1 VRDOs		51,675,000	
2011B Index Floater		119,315,000	
CP Notes		0	
	Variable Rate	\$222,615,000	5.1%
Combined Total		\$4,394,040,000	100.0%

The Airports Authority’s current unrestricted cash balances of \$951.5 million in short-term investments can be netted against variable rate debt exposure to produce a net variable rate exposure. Currently, unrestricted cash balances exceed the amount of unhedged short-term debt.

Exhibit C-2 illustrates the current year rolling three-month average spreads to SIFMA of the Airports Authority’s variable rate programs, as well as historic spreads to SIFMA by quarter.

(IV.D) Swaps – Monthly Swap Performance

2002 Swap: Under the terms of the swap agreement, the Airports Authority pays to the counterparty a fixed rate of 4.445 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparty 72 percent of one-month LIBOR based upon the outstanding notional amount of the swap. The 2002 Swap originally hedged the Series 2002C Bonds and now hedges the 2011A-2 which refunded the Series 2002C Bonds in full. On October 1, 2015, the Series 2011A-2 was converted from Index Floaters to VRDOs. **Exhibit D-2** provides the historical monthly cash flow of the 2002 swaps associated with the hedged VRDOs.

2009 Swaps: Under the terms of the swap agreements, the Airports Authority pays to the counterparties an average fixed rate of 4.099 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparties 72 percent

of one-month LIBOR based upon the outstanding notional amount of its respective swaps. The 2009 Swap originally hedged the Series 2009A Bonds and 2009D Bonds. The Series 2009A Bonds were partially refunded by the Series 2010C2 Bonds and the remaining portion was fully refunded by the Series 2011A-3 Bonds. The 2009 swaps now hedge the 2011A-3, 2009D and 2010C2 VRDOs. On October 1, 2015, the Series 2011A-3 Bonds were converted from Index Floaters to VRDOs. **Exhibit D-2** provides the historical monthly cash flow of the 2009 swaps associated with the hedged VRDOs.

2010 Swap: Under the terms of the swap agreement, the Airports Authority pays to the counterparty a fixed rate of 4.112 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparty 72 percent of one-month LIBOR based upon the outstanding notional amount of the swap. The 2010 Swap hedges the Series 2010D Index Floaters. **Exhibit D-2** provides the historical monthly cash flow of the 2010 swaps associated with the hedged Index Floaters.

2011 Swap: Under the terms of the swap agreement, the Airports Authority pays to the counterparty a fixed rate of 3.862 percent on the outstanding notional amount of the swap. In return, the Airports Authority receives from the counterparty 72 percent of one-month LIBOR based upon the outstanding notional amount of the swap. The 2011 Swap hedges the Series 2011A-1 Bonds. On October 1, 2015, the Series 2011A-1 Bonds were converted from Index Floaters to VRDOs. **Exhibit D-2** provides the historical monthly cash flow of the 2011 swaps associated with the hedged VRDOs.

Refunding Candidates – Governmental Purpose

There are no Governmental Purpose refunding candidates at this time.

Refunding Candidates – Private Activity

There are no current refunding opportunities at this time.

The Series 2009B Bonds may not be advance refunded with tax exempt bonds. As a benchmark for evaluating refunding strategies, the table below shows the results of a hypothetical tax exempt advance refunding.

<i>Series</i>	<i>Callable Par/ Maturities</i>	<i>Range of Interest Rates</i>	<i>Call Date</i>	<i>Call Premium</i>	<i>Net PV Savings</i>

Refunding Candidates – Taxable

There are no taxable refunding candidates at this time.⁴

Below are the refunding guidelines previously accepted by the Board:

Time Between Call Date and Issuance of Refunding Bonds	Traditional Financing Products Minimum PV % Savings	Non-Traditional Financing Products Minimum PV % Savings
0 to 90-days (Current)	Greater of Call Premium or 1%	Call Premium + 1% - 2%
90-days to 1-year	Call Premium + 1%	Call Premium + 2% - 3%
1-year to 2-years	Call Premium + 2%	Call Premium + 3% - 4%
> 2-years	Call Premium + 3%	Call Premium + 4% - 5%

⁴ The Series 2013B Bonds are Taxable and advance refundable. However, the Series 2013B Bonds can only be called prior to maturity with a make whole call provision.

Airports Authority Swap Profile

The table below summarizes the Airports Authority's current swap portfolio. All of the Airports Authority's swaps require payment of a fixed rate by the Airports Authority to the counterparty and the receipt of a variable rate by the Airports Authority based upon 72 percent of LIBOR.

¹³ Amounts as of January 31, 2019; A negative value represents a payment by the Airports Authority to the counterparty if the swap is terminated in the current market; a positive value represents a receipt by the Airports Authority if the swap is unwound in the current market.

Exhibit D-2
Swap Program
Swap Effective Interest Rate to-date and Monthly Performance

2002 Swap: The Airports Authority's 2002 Swap is a fixed-payor interest rate swap. Under the 2002 Swap, (a) the Airports Authority pays a fixed rate of interest, 4.445 percent, to the swap counterparty; and (b) the swap counterparty pays the Airports Authority a variable rate of interest equal to 72 percent of one-month LIBOR. The variable rate received from the counterparty is designed to closely correlate to the interest rate the Airports Authority pays on the underlying variable rate bonds, thereby creating essentially fixed rate debt ("synthetic" fixed rate debt). The Swap Agreement was dated July 31, 2001, and became effective August 29, 2002. The 2002 Swap counterparty is Bank of America. The 2002 Swap hedges the 2011A-2. The swap previously hedged the Series 2002C Bonds until these bonds were refunded by the 2011A-2 Bonds. On October 1, 2015, the Series 2011A-2 was converted from Index Floaters to VRDOs.

2009 Swap: The Airports Authority's 2009 Swap is a fixed-payor interest rate swap. Under the 2009 Swap: (a) the Airports Authority pays a fixed rate of interest, 4.099 percent, to the swap counterparty; and (b) the swap counterparty pays the Airports Authority a variable rate of interest equal to 72 percent of one-month LIBOR, thereby creating synthetic fixed rate debt. The Swap Agreement was dated June 15, 2006, and became effective on October 1, 2009. The 2009 Swap counterparties were Bear Stearns and Bank of America. However, Bear Stearns was bought by JP Morgan in March 2008. The 2009 Swap hedges the Series 2011A-3 Bonds, Series 2009D Bonds and the Series 2010C2 Bonds. The swap previously hedged the Series 2009A Bonds until these bonds were refunded by the 2011A-3 Bonds. On October 1, 2015, the Series 2011A-3 was converted from Index Floaters to VRDOs.

2010 Swap: The Airports Authority's 2010 Swap is a fixed-payor interest rate swap. Under the 2009 Swap: (a) the Airports Authority pays a fixed rate of interest, 4.112 percent, to the swap counterparty; and (b) the swap counterparty pays the Airports Authority a variable rate of interest equal to 72 percent of one-month LIBOR, thereby creating synthetic fixed rate debt. The Swap Agreement was dated June 15, 2006, and became effective on October 1, 2010. The 2010 Swap counterparty is Wells Fargo. The 2010 Swap hedges the Series 2010D Index Floaters.

2011 Swap: The Airports Authority's 2011 Swap is a fixed-payor interest rate swap. Under the 2011 Swap, (a) the Airports Authority pays a fixed rate of interest, 3.862 percent, to the swap counterparty; and (b) in return, the swap counterparty pays the Airports Authority a variable rate of interest equal to 72 percent of one-month LIBOR, thereby creating synthetic fixed rate debt. The Swap Agreement was dated September 12, 2007, and became effective October 1, 2011. The 2011 Swap counterparty is Wells Fargo. The 2011 Swap hedges the 2011A-1. On October 1, 2015, the Series 2011A-1 was converted from Index Floaters to VRDOs.

The following table presents the 72 percent of one-month LIBOR rate received from the counterparties, the average monthly interest rate on the hedged variable rate bonds paid by the Airports Authority, and the resulting effective all-in interest rate on the swap.
